How to start/stop MySql server on Ubuntu 8.04

Posted: May 20, 2008 in **Database**, **Linux**, **Ubuntu**
Tags: **MySql Ubuntu 8.04 Server start stop**

33

To install MySql database:

sudo apt-get install mysql-server

To start MySql server:

/etc/init.d/mysql start

To stop MySql server:

/etc/init.d/mysql stop

To restart MySql server:

/etc/init.d/mysql restart

To check the status of MySql server:

/etc/init.d/mysql status

Good post. Following might be easier especially for Windows folks are more used to services.

    sudo service mysql start/stop/restart

Hi. I am trying to get rid of mysql server 5.0 on ubuntu 8.04 and I get this. help
Removing mysql-server-5.0 …
/etc/lsb-base-logging.sh: line 84: INITOUTPUT: unbound variable
invoke-rc.d: initscript mysql, action "stop" failed.
dpkg: error processing mysql-server-5.0 (–purge):
subprocess pre-removal script returned error exit status 1
/etc/lsb-base-logging.sh: line 84: INITOUTPUT: unbound variable
invoke-rc.d: initscript mysql, action "stop" failed.
/etc/lsb-base-logging.sh: line 84: INITOUTPUT: unbound variable
invoke-rc.d: initscript mysql, action "start" failed.
dpkg: error while cleaning up:
subprocess post-installation script returned error exit status 1
Errors were encountered while processing:
mysql-server-5.0
E: Sub-process /usr/bin/dpkg returned an error code (1)

i tried to start it but i got this ..

navets@navets-laptop:~$ sudo mysql start
[sudo] password for navets:
ERROR 1045 (28000): Access denied for user 'root'@'localhost' (using password: NO)

i iam using password to my php .. but how to write it ?

wanna access ur mysql?

to gain more power, log in using root account like this command;

$> mysql -u root –password=myPassword;

Done!

Thank you very much. Succinct and needed.

I've been wrestling with my MySQL installation all day.

Hi
When I typed command to restart mysql .. It gave me error

$ sudo mysql restart
ERROR 1045 (28000): Access denied for user 'root'@'localhost' (using password: NO)
